We often hear about the potential benefits, but I first started talking about the risks of vaccines on CKLN Radio in 2006 based on thimerasal, a mercury-based preservative thought to help cause the massive increase in autism over the last 30 years. We've known mercury was poisonous for centuries, so the fact that no safer preservative was used was troubling.

Since then, I've learned a lot more about how dangerous vaccines are, especially since the medical establishment refuses to listen to good doctors and scientists who keep re-discovering how bad they are for us. I even campaign managed for Dr. Andrew Moulden for MP in 2008, he's a neuro-psychiatrist who discovered that vaccines cause micro-vascular strokes.

Basically, as foreign particles from the vaccine enter our bloodstream, they float into our tiny capillaries and are attacked by large white blood cells, which then clog and collapse our capillaries and shut-off blood supply to the brain and other organs. Many people are left with partially frozen faces like stroke victims. There's more info below. But: what can we do?

You don't need to take any medicine if you're not sick yet. The idea of vaccines doesn't make sense unless we allow Big Pharma to scare us into buying a million preventive drugs for every potential disease. A strong immune system can handle most illness, but vaccines just damage and weaken us so we demand more drugs. This vicious cycle must be stopped.

People have warned us about the risks of vaccines for decades with lots of evidence. The good news is it's working. I know from friends and I warning people in Toronto that most of us are suspicious of them and getting informed could save us a lot of grief and illness. Please share the info below, the next time Toronto has a vaccine campaign, let's discuss the risks too.

The Shot Is The Pandemic: Swine Flu Vaccines and The CBC

CBC's "The National" news program was looking into why some Canadians are against the idea of taking swine flu vaccines. They recently asked Toronto Truth Seekers to hold our Dundas Square meet-up on a Wednesday afternoon, instead of our usual Saturdays, so they could film it and interview us for that evening's broadcast. Our good friends Dan Dicks and Steve Davies at PressForTruth.ca documented everything. To see what happened, please visit the links below for the YouTube videos.

Vaccine Deaths And Injuries Skyrocket As Cover-Up Implodes

Paul Joseph Watson

Infowars.com

Monday, August 30, 2010

Global revolt against deadly vaccines spreads as cases of debilitating illnesses, soft-kill side-effects and even instant deaths become widespread

Cases of debilitating illnesses, soft-kill side-effects and even instant deaths as a result of vaccinations across the world are skyrocketing as the cover-up of deadly inoculations implodes and more people than ever become suspicious about what they are being injected with by health authorities who have proven they cannot be trusted.

The implosion of the vaccine cover-up is sure to discourage more parents from vaccinating their children in the coming months, with the swine flu shot now being combined with the regular seasonal flu jab. A recent Rasmussen poll found that 52 per cent of Americans were concerned about the safety of vaccines as we approach the start of school and college terms, where many children and teenagers will be "required" to take shots before they can attend.

A global revolt against dangerous vaccines is brewing following a series of cases where children have been killed as a direct result of inoculations.

Mercury, Autism and the Global Vaccine Agenda

1:31:16 - 4 years ago

David Ayoub, M.D. goes through the relations of Mercury to Autism as well its connections to "National Security Study Memorandum 200"; for population control. Showing its shocking connections to today's G.A.V.I. Are powerful forces really trying to help the poor people or could it be for another agenda; the sterilization of the poor? This is an upsetting video, so brace yourself.

<http://video.google.com/videoplay?docid=6890106663412840646#>

.

Note: I even wrote a song about it to help us think about who's behind this mess.
